

Celebrity Selection Fun Styles Project

Find a celebrity you admire—can be an entertainer, politician, band, etc. Create a folder in your PROJECT folder called celebrity and locate images (use Google set to large) of your person/group. Locate 7 images of various poses—they should vary (some closeup, some full body, etc.). Please be sure all pictures are school appropriate. No shirtless guys or girls in low cut tops or with swimwear.

Requirement	Pts	Deducted
Create a new project—set page size to 800 pixels wide and 600 pixels tall; 150 resolution with <u>black</u> background; save as celebrity.psd	5	
Include one large, face only image with layer opacity set at 50% or lower	5	
Include one image with an outer glow with a spread of less than 5% and size of at least 90px	3	
Include a very large image in the background of everything; add a very large <u>inner</u> shadow so that image is shaded inside considerably on all sides (my example uses distance of 100px, choke of 27%, size 177px)	3	
Select a full body shot to use as a silhouette. Apply the Color Overlay layer style and choose the color for the silhouette that matches your theme. Scale down (be sure to hold Shift) and position in a corner.	4	
Include another image (your choice); for this image COPY the layer style from the layer with the outer glow and paste layer style so they match. If it helps the image, add an inner shadow (optional).	3	
Overall quality of selections (refine edge and check on black each time; be sure selections are good!!!) Use Quick Mask or Add to Selection as needed to made good selections.	20	
Add type using the Text tool; use a chunky/fat font; apply the following Layer Styles to the type—Outer Glow, Bevel. Rotate slightly.	5	
Be sure all layers are named! Teacher screencheck of layers: _____	5	
Print in color at 100% scale in landscape orientation	2	
TOTAL	55	

*Remember to save this in JPG format and upload to the proper album in your online portfolio.
