

## JINGLE BELL ROCK (or not) FINAL WEB DESIGN 1 PROJECT

Create a folder in the Webpage\_Design folder and then create a folder called webpage\_final. Save all images and files to this folder.

You will rewrite the lyrics to Jingle Bell Rock. It doesn't have to be Christmas themed, but that's certainly an easy option.

	<u>Your Lyrics....</u>
Jingle bell, jingle bell, jingle bell rock Jingle bells swing and jingle bells ring Snowing and blowing up bushels of fun Now the jingle hop has begun	
Jingle bell, jingle bell, jingle bell rock Jingle bells chime in jingle bell time Dancing and prancing in Jingle Bell Square In the frosty air.	
What a bright time, it's the right time To rock the night away Jingle bell time is a swell time To go gliding in a one-horse sleigh	
Giddy-up jingle horse, pick up your feet Jingle around the clock	
Mix and a-mingle in the jingling feet That's the jingle bell, That's the jingle bell, That's the jingle bell rock	

### PLANNING/PREP

- Create a "blank" version of your page (a template if you will). Save it as blank.html (Save As to create pages)
- All pages must have the same layout and utilize a DIV box in the middle of the page that includes a PNG heading banner. Creating heading banner (800x200px) in Photoshop. Animation is OPTIONAL on the banner. The banner could have transparent areas (cannot just be a rectangle) with a unique shape, images pulled off their backgrounds, and text with the title of your story.
- The DIV should be a solid color; the BODY background should be a tiled, relevant image (not a full size picture).
- First page is index.html and should link to all of the other pages. It should also include a table that is styled to have shading that lists you as the author and designer, project date, and credits any sources of images you use. A bulleted list might be a nice touch.
- Then, you will create page1.html through page5.html that will be each paragraph of your story. Include artwork on each page. Artwork must NOT include any white backgrounds; please use clipart with transparent backgrounds (PNG). And, you must take a still clipart and animate it on at least ONE page. You can do more than that if time permits.
- Each page must have a back, next, and Home button that hyperlinks to the appropriate places. You should NOT have a back or home button on the homepage or a next button on the last page, however!
- Use this site to find buttons, free and easy. <http://www.freebuttons.com/>
- Be sure buttons (when hyperlinked) do not have an ugly border around them.

Example blank.html page (I can then remove the buttons I don't need on the different pages, etc.)

Example index.html

# Sketch Out Your Plan....

Index.html	page1.html	page2.html
page3.html	page4.html	page5.html

<p><u>NOTES</u></p>
---------------------

**SCORING GUIDE FOR WEB DESIGN FINAL PROJECT—Jingle Bell Rock or Not**

name: \_\_\_\_\_

\*\*Be sure to create a site folder for this project. You will turn in your files to Google Classroom assignment for grading after a screen check by Mrs. Rucker. Codes for the CSS page (all pages will use one CSS page).\*\*

✓ <b>Requirement</b>	<b>AWESOME</b>	<b>OKAY....</b>	<b>NEEDS WORK!</b>
<b>Content –20 pts</b>	Text of the entire “song” is used (all 5 paragraphs) and use a similar rhyming scheme. <u>Copyright</u> information including student name and date are included. <u>Title bar</u> includes title of story/song and student first name. Sources of information are credited on index in styled table.	Missing copyright information or improper title bar or rhyming convention is not apparent.	Little effort made to rewrite content for personal theme or missing title bar. Sources not credited for images.
<b>Buttons --20 pts</b>	Graphic <u>buttons</u> are used for Next, Back, and Home and are <u>hyperlinked</u> appropriately; at least ONE button uses a <u>mouseover</u> ; buttons <u>removed</u> from pages where it doesn’t make sense (Home shouldn’t have a Home button, for example). No “hyperlinked” borders appear.	Buttons are not readable or do not match overall theme, issue with one button, missing mouseover, or hyperlinked borders show in one or more browsers.	Buttons are missing or are not hyperlinked.
<b>Graphics –30 pts</b>	High quality graphics are used on every page and clipart has white backgrounds removed; <u>heading banner</u> contains irregular shape, text, and at least two images and is professional	One issue with images but nothing distracting to the overall webpage or images do not have white backgrounds removed.	Low quality or watermarked graphics are used or no animation is included
<b>Spelling/Grammar –10 pts</b>	Document uses correct spelling and grammar	Document contains fewer than 3 spelling errors or has issues with capitalization	Document contains more than 3 errors with spelling, capitalization or grammar
<b>Overall Professional Appearance --30 pts</b>	Site is complete (all 6 pages) with a consistent <u>color</u> scheme and centered DIV; <u>background</u> for body uses an appealing tiled <u>pattern</u> (not a photo).	Site is mostly complete, but contains issues with taste, colors, or structure; photo used instead of tiled background or background is distracting.	Site is incomplete
<b>Efficient Coding and Structure --15 pts</b>	CSS page is submitted and only <u>one</u> CSS page used for entire project with all pages linked to it. INDEX page is printed and coding is neat and error free. <u>Text alternatives</u> used on all images.	Mostly efficient coding is used with some minor errors in syntax or usage or a few typos. Missing text alternatives.	No codes printed or significant errors in coding.
<b>Total—125 PTS X 2= 250 POINTS POSSIBLE</b>			
COMMENTS→ For “bonus” consideration, you may create a FAVICON for your page or create additional animations. Or, add a link to you “singing” your song on your index or ending page!! Fun!!
